Abstract. The article deals with the analysis of semantics of the English, German, Russian and Chechen idioms representing such life values as trust, consent and success in globalization conditions. In different languages similarities are found in cognitive models of idioms’ meanings, conceptualization of trust, consent, and success. The corpus approach has revealed distinctions in the actual meaning of quasi-equivalent idioms, the semantic properties and additional meanings which are not fixed in dictionaries.

Keywords: Idioms, Life values, Corpus approach.

1 Introduction

Life values take an important place in the value system in various cultures. The importance of life values is revealed at the level of a certain, specific person, and also in the context of society, group of people, culture, the country. The hierarchy of life values has a great influence on the psychological state and development of the personality, society.

1.1 Hypothesis

In the most general sense life values are universal for different cultures, but nevertheless there may be the peculiarities characteristic for this or that community, in languages both similarities, and non-trivial distinctions are found/evident.

The aim of this article consists in studying the semantics of the English, German, Russian and Chechen idioms representing life values: trust, consent and success. Cognitive and semantic analysis of idioms will allow to reveal cognitive models of meaning, similarities and distinctions in differently structured languages. Corpus approach will reflect the frequency and contexts of use of idioms, semantic and syntactic properties shown in real contexts; preferential spheres of use, stability or tendency to violation of phraseological integrity; influence of the inner form on actual meaning [2], ability of the compared idioms to appear as equivalents in translation – equivalence at the level of language and speech.

Under the influence of technical progress in the modern world there is such phenomenon as globalization, integration and convergence of different cultures and the people. Development of the international economy, distribution of democratic values
and institutes, migration turn out to be consequence of globalization. In all these processes coincidence of life values as a factor of integration, consolidation and unification, overcoming dissociation and disagreement is of great importance. Values of trust, consent and success are necessary for building relationships, successful communication, development, self-realization and adaptation. The study of the semantics of idioms will reveal the universal, cultural and specific in perception of these values that will promote a dialog of cultures, consent and peace.

2 Methodology

In the work a complex of methods and approaches has been used: cognitive, semantic, comparative, corpus analysis. The material of research includes the English, German, Russian and Chechen idioms collected from phraseological dictionaries of the English, German, Russian and Chechen languages and also contexts of use from The British National Corpus, the Corpus of the Institute of the German language (IDS) in Mannheim, and the National Corpus of Russian. On the example of these idioms it is possible to see the conceptualization of trust, consent and success in different languages. The non-equivalent idioms entering the same taxa have semantic and conceptual similarities, revealing the common cognitive models of meaning. Also such selection of idioms shows specifics of phraseological funds.

3.1 Analysis of the idioms describing trust value

In cognitive linguistics the idioms are considered as cognitive structures, and their semantics, meaning and form as a result of mental transformations. Construction of cognitive models of meaning of idioms will allow to reveal various options of their functioning in speech, conceptual similarities and distinctions in different languages.

Trust – an attachment of belief, hopes to someone – making a connection, touching.

...... you really can’t afford to pin your hopes on the rather uncertain prospects currently in the wind (BNC, 2009).

**German.** In German trust is described as a lack of legal confirmation.

*Auf Treu und Glauben* – "(without legal security), conscientiously, in good faith".

"Wir brauchen ein sicheres System und können künftig nicht mehr auf Treu und Glauben arbeiten". Eine Vertragskündigung schloss er nicht aus, er bezeichnete sie aber als "eher theoretische" Möglichkeit (Rhein-Zeitung, 14.02.2004). (We need a sure employment contract and cannot work in good faith in future anymore. He did
not exclude a termination of contract, he called it, however, "rather theoretical" possibility).

The context reflects the necessity of providing protection of the rights of workers.

**Russian.** Войти в доверие (lit. "to come into trust") – "to gain the trust". Trust as making good relationships.

A gentleman's agreement (also gentlemen's agreement) – "an agreement, a contract, etc. in which nothing is written down because both people trust each other not to break it". Image of the gentleman as a guarantee of honesty, responsibility, reliability.

My own temperament is one that is forever seeking to pour oil on troubled waters (BNC, 2000).

Thus, in idioms the spatial metaphor is mentioned. The consent is associated with closeness, disagreement with distance, overcoming disagreement is a construction and mitigation. National and cultural specificity is also expressed in the second idiom, the gentleman means the noble person from whom the high level of behavior is expected.

Достижение экономических договоренностей открывает политические перспективы (2001) // «Известия», 2001.07.23). (In turn, growth of volumes of production makes the Russian companies more actively "work with elbows" and carve their way to new sales markets).

4 Conclusion

Corpus approach has shown that in contexts the idioms reveal new meanings, shades of meaning, significant for finding functional correspondences in different languages,
for the correct use of idioms in speech. At the same time, the analysis of semantics of idioms in different languages and cultures has shown conceptual similarities and distinctions. In all languages the trust is based on belief, lack of proofs and official written legal confirmation. Consent and reaching an agreement as finding a common language, tool for information report, explanation of the position. An important conceptual similarity is the spatial metaphor "trust and consent – being close", "mistrust, disagreement – being far". Success is associated with a road and moving forward on a horizontal scale. Distinctions are caused by national and cultural specifics. The trust, consent and success are significant values in societies that is expressed in the issues touched upon in modern contexts, migration, successful communication in the process of integration and coexistence.
